Uses- Great for use in landscapes and containers

Exposure- Plant in sun or shade **Height** 15-24" **Spacing** 10-24" **Hardy Temp** 35°F

Big Begonias have big color and big performance. Flowers are positioned at the leaf tip for maximum impact, and were developed specifically with landscape performance in mind. Their deep green or bronze foliage add vibrancy and contrast to their striking red or rose colored flowers. Performing in full sun to full shade, the huge flowers and vigorous habit of this series translates to double the flower power with half the plant material. Flowers continuously until fall's first frost and does not require deadheading.
